European Journal of Operational Research 102 (1997) 667–669

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 102

Invited Review

1 Repairable inventory theory: Models and applications
V.D.R. Guide Jr. and R. Srivastava

Theory and Methodology

21 Aircrew schedule generation using repeated matching
P. Wark, J. Holt, M. Rönnqvist and D. Ryan
36 Purchasing demand information in a stochastic-demand inventory system
G.A. DeCroix and V.S. Mookerjee
58 Joint planning of combined heat and power and electric power systems: An efficient model formulation
D.T. Gardner and J.S. Rogers
73 Scheduling installations in the telecommunications industry
J.J. Shade and A.J. Orman
88 Project scheduling under resource and mode identity constraints: Model, complexity, methods, and application
F. Salewski, A. Schirmer and A. Drexl
111 Single machine scheduling when processing times are correlated normal random variables
R.J. Boys, K.D. Glazebrook and C.M. McCrone
124 Inclusion of flexibility benefits in discounted cash flow analyses for investment evaluation: A simulation/optimization model
R.V. Ramasesh and M.D. Jayakumar
142 A hybrid two-stage flowshop with part family, batch production, major and minor set-ups
S. Li
157 Estimating the Held-Karp lower bound for the geometric TSP
C.L. Valenzuela and A.J. Jones
176 On the analytic representation of the Leximin ordering and its application to flexible constraint propagation
R.R. Yager
193 Distribution requirements and compactness constraints in school timetabling
A. Drexl and F. Salewski
215 Introduction to a new weighting method – Hierarchy consistency analysis
Y.-Y. Guh
227 Waiting times of a finite-capacity multi-server model with non-preemptive priorities
D. Wagner

Sections

242 OR Software – ORSEP: Operations Research Software Exchange Program, *Professor H.W. Hamacher (ed.)*
DECOPOL – Codes for decomposing a polygon into convex subpolygons
J. Fernández, L. Cánovas and B. Pelegrín
244 Book Reviews
H. Fleuren (ed.)

Feature Issue: Fourteenth EURO Summer Institute: Environmental Planning

247 Editorial
C.P. Pappis
248 Operations research and environmental planning
S.E. Daniel, D.C. Diakoulaki and C.P. Pappis
264 Production planning and inventory control with remanufacturing and disposal
E. van der Laan and M. Salomon
279 How to benefit from decision analysis in environmental life cycle assessment (LCA)
P. Miettinen and R.P. Hämäläinen
295 Semi-obnoxious location models: A global optimization approach
D. Romero-Morales, E. Carrizosa and E. Conde
302 The obnoxious p facility network location problem with facility interaction
S.B. Welch and S. Salhi
320 A decisional procedure for water resources planning taking into account water quality constraints
E. Avogadro, R. Minciardi and M. Paolucci
335 Collaborative environmental planning with GeoMed
N. Karacapilidis, D. Papadias, T. Gordon and H. Voss
347 An interactive decision-making approach based on intelligent systems to redraw district boundaries in regional planning
I. Moulalek
364 Multicriteria analysis vs. externalities assessment for the comparative evaluation of electricity generation systems
S. Mirasgedis and D. Diakoulaki
380 A model for long-term global air quality prediction and development of efficient control strategies in Turkey
G.S. Kumbaroğlu
393 Solving an equilibrium model for trade of CO_2 emission permits
B. Bueler

Invited Review

405 Integrated assessment models for acid rain
L. Hordijk and C. Kroeze

Case Study

418 Demand estimation with failure and capacity constraints: An application to prisons
P.K. Lattimore and J.R. Baker

Theory and Methodology

432 Integration of price-depending demand reactions in an optimising energy emission model for the development of CO_2-mitigation strategies
M. Wietschel, W. Fichtner and O. Rentz
445 On the interaction between indirect cost allocations and the firm's objectives
F.J. Arcelus, J. Bhadury and G. Srinivasan
455 Computer aided decision support system for water strategic planning in Jordan
T. Al-Shemmeri, B. Al-Kloub and A. Pearman
473 A neural network approach to the vessel dispatching problem
K. Vukadinović, D. Teodorović and G. Pavković
488 Designing paced assembly lines with fixed number of stations
H.F. Uğurdağ, R. Rachamadugu and C.A. Papachristou
502 One-machine job-scheduling with non-constant capacity – Minimizing weighted completion times
H.F. Amaddeo, W.M. Nawijn and A. van Harten
513 A neighbourhood scheme with a compressed solution space for the early/tardy scheduling problem
R.J.W. James and J.T. Buchanan
528 Heuristics for unrelated machine scheduling with precedence constraints
J. Herrmann, J.-M. Proth and N. Sauer

538 A Monte Carlo investigation of incomplete pairwise comparison matrices in AHP
F.J. Carmone Jr, A. Kara and S.H. Zanakis
554 A procedure for optimizing tactical response in oil spill clean up operations
A.V. Srinivasa and W.E. Wilhelm
575 Bank asset and liability management under uncertainty
C.B. Oğuzsoy and S. Güven
601 A reference direction approach to multiple objective quadratic-linear programming
P. Korhonen and G.Y. Yu
611 Lagrangian heuristics for the two-echelon, single-source, capacitated facility location problem
S. Tragantalerngsak, J. Holt and M. Rönnqvist
626 A constrained nonlinear 0–1 program for data allocation
R. Sarathy, B. Shetty and A. Sen
648 Fuzzy sharing problem by possibility measure
T. Itoh and H. Ishii
657 On the convergence of the block principal pivotal algorithm for the LCP
S. Takriti and K.G. Murty

667 Contents Volume 102
